

Tennisseries™

Tennisseries™

Passionate lighting design from Sportlightdesign

Tennisseries™ *Exclusive materials, Passionate design & Functional illumination*

The Tennisseries™ lighting fixture range combines the beautiful shape of the tennis ball with quality glass and low energy light sources.

The characteristic groove is carefully sandblasted into the surface by hand and gives a unique contrast to the shade when lit.

The range is available in four colors and two surface editions, glossy and matte.

Lights of the Future

Our Designer Søren Momsen

Innovative industrial designer

Søren Momsen graduated from Denmark's Design School in 1997 as Industrial Designer specialized in lighting design.

Søren is internationally recognized for his ability to combine storytelling in light designs. A story that gives the designs more than just the function of lighting up a room. A story of energy being transformed into light and a story that borrows elements from archetypal shapes.

With the Golfseries™ & Tennisseries™ lighting fixtures, Søren Momsen has taken the sculpturally beautiful shape of the golf & tennis ball into a new dimension, creating a series of exclusive and timeless indoor lighting fixtures.

Søren has won international design competitions such as "Lights of the Future" og "Lights of Tomorrow".

Lights of Tomorrow

High Quality Glass

The Tennisseries™ shade is made by high quality glass. The outer glass layer comes in the four different colors, optic yellow, wimbledon white, orange and black. Inside the shade an opal layer helps dimm the light energy.

The thickness of the glass is significant and enables the groove to be cut into the surface, using sand blasting technique.

Eco-friendly light sources

Tennisseries™ uses the E14 lamp holder allowing the owner to select between Standard, Energy saving or LED light bulbs. We recommend that the choice of light source is based on where the lighting fixture is used.

- The Philips Novallure Series (LED) is ideal for bedroom lighting
- The Philips e-Saver series is ideal for Living Room, Kitchen, Office etc.

Restaurant A

HIK - Restaurant A

HIK has used Tennisseries™ from Sportlightdesign as indoor decoration in their historic restaurant drawn by the internationally recognized architect Arne Jacobsen. They have used the Tennisseries™ Pendants above the bar.

"Tennisseries™ is a well designed high quality lighting fixture that blend into the historic setting perfectly".

Jesper Søe, Owner Restaurant A

The DTF office

The Danish Tennis Federation

At DTF it's all about tennis and improving the game in Denmark. At the office situated just outside of Copenhagen, Tennisseries was selected as lighting solution at the meeting room.

Choosing "Tennisseries"™ was not a tuff decision when you love tennis and for our setting they are perfect. As a lighting fixture they are very decorative and the designer has succesfully combined design, sport and functionality.

Niels Persson, Managing director DTF

About the Federation

Situated: 5 km West of Copenhagen
Members: Federation for +62000 tennisplayers
Products: Tennisseries™ Pendants
Shade colors: Optic Yellow and Orange

Tennisseries™ Pendant

Glass, E14 E-Saver

Tennisseries™ Pendant

The Tennisseries Pendants has more to it than just the lighting functionality. In the day time they float in the air like over-size tennis balls.

When lit the well-known shape comes to life as light energy beams through the glass and the sand blasted groove.

Café Match Point

Hørsholm Rungsted Tennis Club

HRT has used Tennisseries™ from Sportlightdesign as indoor decoration in their café. They have used the Tennisseries™ Up-Light and Pendant products lighting up pictures, tables, sponsor logo's and the café counter.

"Tennisseries™ was without doubt the natural choice for our Café. It's a well designed high quality lighting fixture range providing excellent light in a very decorative way".

Annette Wiencken, HRT Chairman

Wall mount:	Chrome bracket
Dimensions:	Ø 12 cm
Light source:	E14 E-Saver
Cord:	Internal
Max Watt:	35 Watt
Model no:	225-334-793

Made in EC
Assembled in Denmark

Sweet Dreams

Tennisseries™ as bedroom reading light.

The Tennisseries™ Wall edition is ideal as reading or bedside lighting. The Wall edition has the shade stretched 20 cm out from the wall surface.

As an alternative, the Tennisseries™ Up-light version can be turned upside-down, as shown below.

Tennisseries™ Wall

Glass, LED or E-Saver

Tennisseries™ Wall

It's an excellent lighting fixture for the bedroom or as a reading light in the living room.

The high quality LED light source offers extreme lifetime and low power consumption - and a very little heat from the light bulb - making it a perfect reading light.

Multi-flexible joint makes regulating the shade easy

Specifications

Design:	Søren Mønsen
Shade:	Glass
Color:	Yellow, White, Orange, Black, High Luster or Satin
Wall mount:	Chrome bracket 20 cm arm + joint
Dimensions:	Ø 12 cm
Light source:	GU10 LED
Cord:	Intern
Max Watt:	35 Watt
Model no:	223-334-762

Assembled in Denmark

Living Room Lighting

The Tennisseries™ Pendants is in this case used as lighting solution in the living room hanging above a classic bookcase from Jesper Holm. Notice the remarkable contrast in the black edition between the groove and the shade.

The pendant lights can be used in a multitude of ways and can easily adorn a living room, dining area, kitchen or an office. The opportunities are endless. Below the Wimbledon white edition is shown with a red cord.

Golfseries' Spot

Woodlands Country Club

Woodlands Country Club is placed in a hilly Swedish forest landscape with many lakes only 30 minutes by car from Helsingborg. Besides a magnificent 18 hole golf course Woodlands consists of a professional golf academy, a modern club house with a newly established golf shop and a fine restaurant. In the spring of 2007 the building of 59 serviced life style houses commenced.

"Our Golfseries'™ lighting fixtures are very nicely made and well designed. We enjoy the change in the position from the high luster surface and cool white expressions, to the warm honycamb look when the light energy beam the classic"
