The ball's in our court

From Grand Slam tennis venues to school netball and tennis courts, Rebound Ace® Sports Surfaces have the ideal surface to fit both sport and budget requirements for a wide range of applications.

Rebound Ace® Grand Slam

Recognised by elite players the world over, Rebound Ace® Grand Slam is the ultimate cushioned hard court system. As an official Grand Slam surface, Rebound Ace® Grand Slam delivers the right combination of bounce, ball response and player comfort. Because the special surface texture and unique layered cushioning benefits all styles of play, Tennis Australia also recommend it as an ideal surface to promote good stroke and tactical skills development for junior players. The surface never loses resilience from age or hard wear.

Rebound Ace® Air Cushion

Rebound Ace® Air Cushion provides a unique system for both indoor and outdoor applications. It retains all of the benefits of Rebound Ace® Grand Slam with the extra advantage that it is more economical to install and can also be laid over most old or deteriorating surfaces whether it be indoor carpet, synthetic grass, concrete or asphalt surfaces. The optional Dynamic Cushion Base allows Rebound Ace® Air Cushion to also cover clay courts or provide an economical base construction for new courts.

Rebound Ace® Pro

Rebound Ace® Pro use a liquid rubber cushion system offering the same cushioning benefits of Rebound Ace® but uses a thinner section (thickness) of rubber. Installed with a highly efficient application system, Rebound Ace® Pro delivers a high performance, affordable, cushioned surface that is generally used for netball and smaller tennis centres. Rebound Ace® Pro offers a range of thicknesses with the final decision often determined by affordability. It is very quiet underfoot and has been sold into places like public viewing areas for a nocturnal wildlife sanctuary.

Rebound Ace® Synpave

Using a combination of the latest technologies and highest quality raw materials, Rebound Ace® Synpave has proven to be the longest lasting, entry level hardcourt surface on the market. This non-cushioned hardcourt sports surface is ideal for many activities and is extremely popular with schools and clubs. It is generally used for school sport and play areas, public courts in suburban parks and other high traffic areas. It is suitable for all ball sports and recreational activities.

Rebound Ace® Impact

Rebound Ace® Impact is ideal for school and community halls providing the perfect multi function surface for performing arts, assemblies, functions, expos and exhibitions as well as covering multi sport applications. In most cases, the floor is multi line-marked for various court sports, giving great value for money. As with all Rebound Ace® products it provides the durability that allows for extremely low maintenance.

Champions from the ground up

The World's favorite playing surface

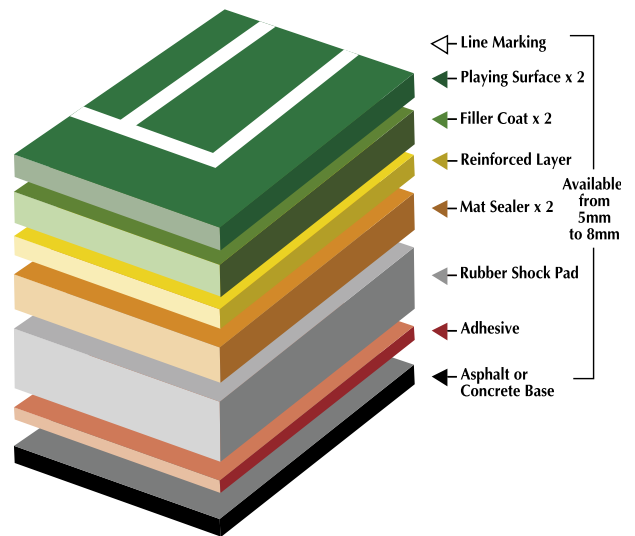

Charge the net atop a Rebound Ace® Sports surface and you will experience the same high performance court that the champions do at the Australian Open. Rebound Ace® has become the most favoured cushioned hardcourt system with tennis players around the world, so it's no surprise that every Australian Open Grand Slam tournament since 1988 has been played on a Rebound Ace® court.

The high performance qualities of Rebound Ace®, along with the specialised expertise behind its manufacture and installation, has led to the development of an extensive range of world class hardcourt and cushioned sports systems. Branded under the name Rebound Ace® Sports Surfaces, these superior systems provide surfaces for a host of indoor and outdoor sports throughout the world.

As the holder of international patents on its unique cushioned systems, Rebound Ace® sports is constantly developing high quality systems for a wide variety of sports. The end result: performance-enhancing surfaces preferred by both top professionals and weekend amateurs alike.

The guarantee of quality

Rebound Ace® Sports systems can be found all around the world. From major sporting complexes and five star resorts in the USA, Europe and Asia to private homes and sports facilities in suburban Australia, Rebound Ace® Sports has built a reputation for quality and performance. The firm's International Quality Rating (ISO 9001), provides the confidence that each of its sports surfaces exceeds the highest standards. It is a reputation we stake our name on.

The ideal Surface

The Rebound Ace® high performance system actually reduces stress on the body making it popular with players from a variety of sports. Tennis players talk about its true bounce and being fair to all styles of play, netball players prefer its high level of player comfort and grip whereas volleyballers and gymnasts comment on its cushioning effect on the body. In many cases, it has proven to dramatically reduce the incidence of injuries.

Environmentally sound and economical

All Rebound Ace® Sports Surfaces are designed for maximum durability, low maintenance and economic efficiency.

It is in the area of low cost maintenance and recoating that a Rebound Ace® Sports Surface dramatically outshines its competitors. The fact that you can economically and easily clean, repair and recoat Rebound Ace® Sports surfaces means that they last longer than other playing surfaces, thereby providing lower long term maintenance costs.

Rebound Ace® Sports Surfaces require less maintenance time, use less energy and less water... important factors for protecting our environment.

The winner's surface

Since 1988 the Australian Open has been played on a Rebound Ace® court at Melbourne Park. Rebound Ace® is one of only four approved Grand Slam court surfaces. A whole host of champions have played and won on Rebound Ace and can thoroughly recommend the surface.

"I'm delighted that Rebound Ace is the surface for the Next Generation Clubs' Australian Men's hardcourts in Adelaide. It's such a rewarding surface for all players... it's easy to see why Rebound Ace has been the tennis surface chosen since 1988 for the Australian Open."

Mark Woodforde

Putting something back

All Rebound Ace® surfaces are environmentally friendly. They are manufactured using a combination of water based, solvent free, acrylic and polyurethane technologies and contain a large percentage of recycled rubber for the cushion layers. This rubber is derived from recycling car tyres, and sports shoes in association with Nike Grind.
