

Golfseries™

# Golfseries™

Elegant lighting design  
from Sportlightdesign

**Golfseries™** *Exclusive materials,  
Passionate design & Functional illumination*

By combining the beautiful, sculptural shape of the golf ball with handcrafted porcelain and well-conceived light distribution, Søren Mønsen has created a timeless lighting fixture with a unique expression.

The porcelain lends the lamp a soft white surface, hinting at the dimples of the golf ball, which changes appearance once lit - into a glowing effect, displaying beautifully tuned symmetry.

Lights of the Future

# Our designer Søren Momsen

## Innovativ industriel designer

Søren Momsen graduated from Denmark's Design School in 1997 as Industrial Designer specialized in lighting design.

Søren is internationally recognized for his ability to combine storytelling in light designs. A story that gives the designs more than just the function of lighting up a room. A story of energy being transformed into light and a story that borrows elements from archetypal shapes.

With the Golfseries™ & Tennisseries™ lighting fixtures, Søren Momsen has taken the sculpturally beautiful shape of the golf & tennis ball into a new dimension, creating a series of exclusive and timeless indoor lighting fixtures.

Søren has won international design competitions such as "Lights of the Future" og "Lights of Tomorrow".
